CAREER OBJECTIVE

I am a quick learner and adaptable team player with a passion for backend development. Highly motivated to design, develop, and optimize scalable backend systems, I specialize in programming, database management, and API integration. I aim to contribute to a forward-thinking organization by delivering efficient, secure, and reliable applications while fostering collaboration and continuously expanding my technical expertise.

CAREER EXPERIENCE (TRAINING)

- ✓ Contributed to backend development projects under the guidance of senior developers, assisting with tasks such as building APIs, integrating databases, and optimizing server-side performance.
- ✓ Wrote clean, efficient Python, Django and Api code to implement backend functionality, ensuring scalability, security, and adherence to software development best practices.
- ✓ Collaborated closely with front-end developers, designers, and project managers to coordinate tasks, integrate APIs, and troubleshoot challenges, contributing to a cohesive and efficient team dynamic.
- ✓ Provided input and feedback on database architecture, API design, and backend workflows, offering suggestions for enhancements to efficiency, security, and scalability based on performance testing and user feedback.
- ✓ Actively participated in team meetings, brainstorming sessions, and code reviews, sharing ideas, asking questions, and offering constructive feedback to support team collaboration and continuous improvement.
- ✓ computer operator
